INSTALLATION INSTRUCTIONS

- Switch off the power.
- Unload the lampshade and open it.
- Pass the wire through the hole in the bottom and connect the power wire into the terminal block according to the connection-wire diagram. Install the lamp at the position where you need with inflated screws.
- Switch on the power and test it.

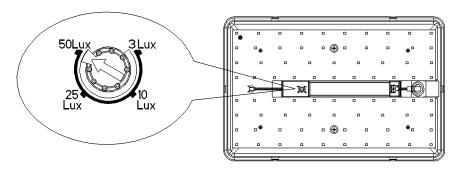

CONNECTION WIRE DIAGRAM

TEST

- Slide the LUX knob to 50LUX and switch on the power. When you test in the daytime, you should cover a black opaque cloth on the lamp.
- When the cloth mantles the lampshade, the ambient light is less than about 50LUX, the lamp will turn on automatically after about 20s.
- Keep the lamp ON not less than 15s, then when you take away this cloth and the ambient light gets brighter more than about 150LUX, the lamp will switch off automatically in about 15s.
- Slide the LUX knob to 3LUX, the lamp will turn on when the ambient light is less than 3LUX.
- When you set LUX knob to other marked positions, the lamp will turn on when the ambient light reaches the required LUX value.

NOTE

- In front of the lamp, there should be no obstruction affecting it receives natural light.
- The working of lamp may be different when installed in a bright or dark place as it works according to the condition of ambient light.
